

INTEGRATED STRIP T5 4FT LED MUSHROOM GROW LIGHT

24W LED

54W FLUORESCENT
REPLACEMENT

Energy Saving & Lower Heat

Uses 60% less energy than 54W T5 HO 4FT fluorescent lamps without sacrificing photon output, greatly reducing heat and the need for more vertical space.

Blue Sun Spectrum

Deep blue and full-spectrum cool white light accentuates colors and promotes healthy development of gourmet and medicinal mushrooms.

Seamless Connectivity

Easily connect up to 16 grow lights via daisy-chain cable (120V) and create uniform light for any growing application.

IP65 Rated

Protects fixture and electrical connections from dust and water exposure commonly found in high humidity mushroom cultivation environments.

Ready to Grow

Each 2-pack comes complete with integrated tubes (non-replaceable), a 120V power cord, daisy-chain cable and suspension-mount installation hardware.

Extra-Long Lifetime & Guarantee

Features an exceptional 40,000-hour lifetime and a 3-year warranty.

Blue 400-500 nm

Improves overall plant health and quality including taste, aroma, color and nutrition. Helps promote plant compactness and root development.

Green 500-600 nm

Increases overall plant photosynthetic efficiency and penetrates the canopy to encourage growth of lower leaves. Makes detecting issues like pests and disease on plants easier to see.

Red 600-700 nm

Promotes plant photosynthesis and increased biomass. Essential for leaf expansion and stem growth. Helps regulate plant flowering, photoperiod and germination.

Far-Red 700-750 nm

Promotes expansion and stretching of leaves and stems. Penetrates the canopy to encourage growth of lower leaves. When used with 660-680 nm wavelengths, plant photosynthesis rates increase via the Emerson effect.
